

Edgeboard™ Total Protection with Edgeboard

Versatile Packaging Solution

Edgeboard Advantages

Edgeboard is manufactured from Polyolefinic materials reinforced with Cellulose fibers and wrapped for finish and strength. Edgeboard resists moisture making it ideal for overseas shipment by sea and for wet climates. Edgeboard prevents load damage caused by constant rough handling and transportation allowing loads to arrive at their destinations safely and intact.

Features and Benefits

- Withstands moisture to protect products in adverse conditions
- Sturdy construction enables corner board to be reused
- Can be fabricated by easily nailing, stapling or by applying screws
- Available in wide range of cross sections, ideal for variety of applications

Edgeboard™ Total Protection with Edgeboard

Versatile Packaging Solution

Increased stacking strength

Stable stacking and perfect alignment keeps the package intact.

Corner protection

Provides protection against edge damage and prevents strap indentation.

Unitizing

Water resistant Edgeboards remain stable and unitize even in wet and humid conditions.

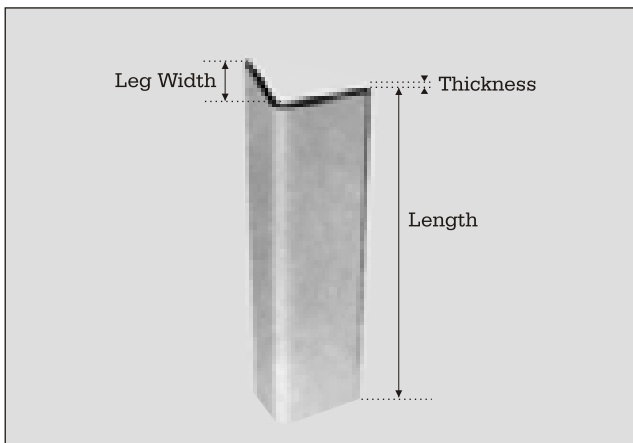

Cost efficient

Reduces storage space. Reduces gross weight.

Easy to use

Perfectly shaped for ease of insertion and performance.

Our Application Engineers can develop customized solutions for your special requirements.

Standard dimensions

Leg Width (in mm)	Thickness
35 x 35	3.0 mm
50 x 50	3.0 mm
60 x 60	4.0 mm
75 x 75	4.0 mm
75 x 75	6.0 mm

The Company has a policy of continuous product development and reserves the right to alter specifications without prior notice.
